

SEO & Broken-Image Cleanup — Work Completed Report

accesscoliving.com — branch: seo

Summarizes all changes made across this session in response to the SEO_Final_Report.pdf audit (Semrush + AIOSEO + AI Audit, 13-14 July 2026), plus additional broken-image issues discovered and fixed that were outside that report's original sample. Generated 14 July 2026.

1. Grokly Product Image Cleanup

File: lib/groklyProducts.js — grep-found and fixed **23** fragile/dead image hotlinks across 5 banned hostnames (grofers.com, gstatic.com shopping-thumbnails, flixcart.com, zeptonow.com, instamart-media-assets.swiggy.com). Every replacement is a verified Unsplash/Pexels URL (HTTP 200 + image/* content-type checked with curl before use).

Product	Old broken host	Fix
Capsicum - Green	gstatic.com	Pexels 2893635
Cauliflower	gstatic.com	Pexels 7572005
Amul Cheese Slices	gstatic.com	Pexels 36040972
Amul Fresh Cream	gstatic.com	Pexels 5908003
Doritos Nacho Cheese	gstatic.com	Pexels 7033900
Pringles Original	gstatic.com	Pexels 34466116
Coca-Cola Soft Drink	gstatic.com	Pexels 15205136
Sprite Lime Flavoured	grofers.com (dead CDN)	Pexels 4045205
Nescafe Classic Coffee	gstatic.com	Pexels 7507583
Cadbury Dairy Milk	flixcart.com (was a rakhi-set photo!)	Pexels 4113363
KitKat Chocolate	gstatic.com	Pexels 15911875
5 Star Chocolate	flixcart.com	Pexels 32402905
Aashirvaad Atta	gstatic.com	Pexels 5441094
Fortune Sunflower Oil	gstatic.com	Pexels 31275834
Everest Garam Masala	flixcart.com	Pexels 2802527
Yoga Bar Milk Shake	gstatic.com	Pexels 18142621
Oziva Plant Protein	flixcart.com	Pexels 13779116
Yoga Bar Power Up Bar	zeptonow.com	Pexels 13111782
Yoga Bar Protein Minis	zeptonow.com	Pexels 6208140
Vim Dishwash Gel	flixcart.com	Pexels 10573258
Harpic Toilet Cleaner	flixcart.com	Pexels 5217885
Milky Mist Paneer	instamart-media-assets.swiggy.com	Pexels 19460144
Milky Mist Greek Yogurt	instamart-media-assets.swiggy.com	Pexels 4006347

2. Swadishtt "Coastal / Seafood" Category

app/services/swadisht/categories/page.jsx — replaced the coastal category's Unsplash URL (previously unverified) with a curl-verified prawns-in-curry-sauce photo (photo-1781684081404-5c090011b53e), keeping the same `?w=800&fit=crop` convention used by every sibling category.

app/services/swadisht/components/CategorySection.jsx — the Coastal tile was wrongly pointing at `swadisht-icon.png` (the generic site logo). Downloaded a real, verified Kerala fish-curry/banana-leaf meal photo (Pexels 13243817), resized to ~300 KB / 1000px wide to match sibling category images, and saved it to `public/images/swadisht/categories/coastal.jpg`. Updated the component to point there.

3. Blog Thumbnail Fallback

`lib/blogService.js` referenced a fallback image `/images/download (2).png` that did not exist on disk. Downloaded a warm, generic "coffee + notebook + laptop" placeholder photo (Pexels 414565), converted it to a genuine PNG (was saved as JPEG bytes under a .png name — fixed with Pillow), resized to 1200x800 (~1.4 MB), and saved to the exact path/filename referenced in code. No application code was changed for this task.

4. Additional Broken-Image Fixes Found During Verification

While cross-checking the SEO_Final_Report.pdf against the live codebase, several more broken/banned image sources were discovered that were outside the original task's 5-hostname scope. All were curl-verified and fixed:

File	Issue found	Fix
app/services/grokly/components/ProductCard.jsx	getProductImage() fallback map: ~40 dead cdn.grofers.com URLs across 18 categories (fires on every product image error)	Replaced entire map with verified Pexels photos, 1 per category
app/services/grokly/lib/dishesData.js	2 more cdn.grofers.com URLs (Basmati Rice, Garam Masala ingredient entries)	Replaced with verified Pexels photos
app/services/grokly/page.jsx	getIngredientImage() masala-oil fallback Unsplash URL returned 404	Replaced with verified Pexels spices photo
app/services/grokly/lib/groklyData.js	This is the ACTUAL live category-nav data (page.jsx imports products from here). Its categories array had 9 Pinterest hotlinks (i.pinimg.com) plus BigBasket/PotatoPro/Tistatic/Adobe-style CDN links	Replaced all 18 category images with verified Pexels/Unsplash URLs
lib/groklyProducts.js	3 more genuinely broken URLs outside original scope: Tomato (bittmanproject.com, 403), Dove Soap (velocitymarketplace.in, 404), Haldiram's Moong Dal (haldirams.com, 404)	Replaced with verified Pexels photos
app/services/swadisht/lib/swadishtData.js	10 restaurant logImage fields using Pinterest hotlinks; 2 dish photos (Mutton Biryani, Pasta Alfredo) returning 404 from Unsplash	Replaced all 12 with verified Pexels photos

5. Homepage Thin-Content Fix

app/page.js + app/homepage.css — the AI Audit flagged the homepage as relying on a hero video and icon tiles with almost no crawlable prose, contributing to Semrush's low text-HTML-ratio and low word-count findings. Added a genuine 155-word "India's Intelligent Circular Commerce Ecosystem" section (semantic <h2> + two paragraphs covering Grokly, Swadisht, InstaStyle and the Xpense Meter) just before the footer, styled to match the existing dark homepage theme.

6. Status vs. SEO_Final_Report.pdf Action Plan

Cross-checked the report's Priority 1/2/3 action items directly against the current code. Legend: **Fixed** = confirmed in code this session | **Partial** = some but not all affected pages/items addressed | **Open** = confirmed still not done | **N/V** = not verifiable from code alone (needs live crawl/build/rich-results test).

Priority 1 — Errors

#	Item	Status
1	De-duplicate brand suffix in title template	Fixed
2	Canonical pointing to homepage instead of self (FAQ / InstaStyle / Grokly)	Fixed
3	5 broken internal + 17 broken external images (Semrush)	Partial
4	2 invalid structured-data items	N/V
5	1 incorrect sitemap.xml entry	N/V
6	Homepage title >64 chars	Fixed
7	/images/asterik.png missing alt	Fixed
8	Missing og:url	Fixed
9	Unminified JS chunk	N/V
10	Grokly localhost og:image	Fixed

Priority 2 — Warnings

#	Item	Status
1	Add H1 to 50 pages missing one (site-wide, Semrush)	N/V
1b	Duplicate H1 on homepage (Hero + Xpense Meter)	Fixed
2	57 low-word-count pages / 87 low text-HTML-ratio pages (site-wide, Semrush)	N/V
3	Homepage meta description too short	Fixed
4	3 broken external links	N/V
5	Grokly / InstaStyle oversized titles	Fixed
6	30 underscore URLs	Partial
7	OG/Twitter tags copied from homepage template (FAQ, InstaStyle)	Fixed
8	Swadisht missing meta description / stale ©2025 footer	Fixed
9	Homepage thin crawlable text	Fixed

Priority 3 — Notices

#	Item	Status
1	92 permanent redirects (site-wide, Semrush)	N/V

#	Item	Status
2	28 pages with only 1 incoming internal link	N/V
3	HSTS not enabled	Fixed
4	FAQPage JSON-LD schema on /faq	Fixed
5	Swadishtt footer placeholder "#" links	N/V — footer no longer present on page
6	App store badges linking to "#"	Open — acceptable pre-launch

7. What Still Needs a Live Re-Audit

- Semrush's site-wide, 90+ page crawl counts (missing H1s, low word count, low text-HTML ratio, redirect count, internal-link distribution) cannot be confirmed fixed without deploying this branch and re-running Semrush / AIOSEO / a fresh crawl.
- 2 structured-data items Semrush called invalid, and the JS-minification finding, need Google's Rich Results Test and a production next build inspection respectively — not fixable by reading source.
- The Facebook footer link returned HTTP 400 to a curl check, but Facebook blocks non-browser requests even for valid links, so this was left untouched rather than guessed at.
- groklyProducts.js still references other third-party CDNs (m.media-amazon.com, www.bbassets.com, plantix.net, and ~15 smaller brand/marketplace sites) that were spot-checked with curl and returned HTTP 200 with a browser user agent, but real hotlink-protection is often Referer-based and can't be 100% ruled out without loading the actual live page in a browser.

8. Files Changed This Session (no commits made)

- lib/groklyProducts.js
- app/services/grokly/components/ProductCard.jsx
- app/services/grokly/lib/dishesData.js
- app/services/grokly/lib/groklyData.js
- app/services/grokly/page.jsx
- app/services/swadisht/categories/page.jsx
- app/services/swadisht/components/CategorySection.jsx
- app/services/swadisht/lib/swadishtData.js
- app/page.js
- app/homepage.css
- public/images/download (2).png (new file)
- public/images/swadisht/categories/coastal.jpg (new file)

No git commits or pushes were made — all changes are working-tree edits only, awaiting review.
